So we met w the City Engineer yesterday and BOE is moving as fast as they can on it. They're just waiting for authorization from caltrans now. She will try to get them to expedite but doesn't want us to interfere at this point. It will be ready for bid in Jan, awarded in May, done in October 2014. Nothing we didn't already know

Can we get Mike some good publicity in our newsletter by mentioning that he met with BOE in an effort to speed-up the City's work on Sepulveda landscape improvements / tree replacements? How about a quote from the Councilman? I'd like to show that he's concerned about and invested in local improvements and this one has a whole lot of attention on it.

Do you know anything new about Vahik's schedule?

Did we ever get a meeting with him set up?
